* Prices are per scan

Epson V750: High resolution scan from our Epson V750 Pro flatbed, suitable for previewing or printing up to A4. Uses digital ice tech to remove dust and scratches from damaged negatives.

Imacon 3F(RAW): 3F scan from our Imacon 646 (3F files are as close as one gets to a digital negative archive. 3Fs store the entire reading of the scanner sensor without clipping or changing any information. Makes it possible to start over from the original scan and make any adjustments, like camera RAWs). A free Flexcolor app is used and included in the zip with images. Files are not color corrected nor retouched for dust and scratches. *Does not work on OSX Catalina or later. Works on all Windows-operated computers.

Imacon FT(Fine-tuned): Scans are made by our specialist and tuned for color and tones properly before exporting to tiffs. Will be color corrected, dusted, and retouched to as close of a final image as possible. Clients may give directions, examples, and proofs of the same image to match if needed.

Optical resolution: The full optical resolution for an Imacon 646 for 35mm film is approximately 6400, and for 120mm film is approximately 3200.

Self Service

All services are hourly unless stated otherwise.
Time is calculated from lab entry to exit.

Digital Lab

| | |
|--|-----|
| Epson V750 | 7€ |
| Imacon Precision ii | 11€ |
| Imacon 646 | 15€ |

About Us

<Rebrandt> began as a weekly critique session under the name fk-kollektiv, open to anyone who wanted to show their creative works, offer insight, or simply come and observe. It enticed amateurs and professional artists alike, keen on exploring new projects.

In our space, artists can develop film, scan, and print, allowing them to create artwork affordably. The melting pot of people is exciting, pushing artists to dive deeper in their work, gain a sense of community in the local art industry, and build the confidence to continue pursuing their creative passions.

<Rebrandt> blossomed into a thriving art store with a network of artists, such as photographers, sculptors, installation artists, illustrators, performers, and dancers - all running workshops, creating collaborations, and eliciting reactions and conversations.

We are an organically grown sphere that supports and breeds local art and artistic experiments. We engage in all practices with the knowledge that art can and should be progressive. We question the status quo and allow for new ways of thinking. We are intersectionally feminist, anti-racist, and queer.

<Rebrandt> offers growing professional services and a self-service lab dedicated to providing high-quality and professional-grade equipment to artists at affordable costs. The upkeep of the space and affordable services are supported by our growing membership of patrons and donors, funds from our services, and our art store.

Why us?

<Rebrandt> is an artist-run art store and workshop space that provides artists the chance to profit directly from their creative labor and art pieces. It is a space for collaborative learning through the exchange of ideas and skills. It supports personal, artistic, and professional growth. It is also an open exhibition platform allowing for playful, radical experimentation and exploration.

We are an interdisciplinary multitude of artists coming from varying countries, cultures, academic, creative, and practical backgrounds.

The artwork presented has ranged from photography, installations, digital explorations, as well as immersive performance art pieces.

Support us...

...by buying our art. The profits go directly to the artist(s) that created it, which financially supports the respective artist(s), thus allowing them to further their creative pursuits and therefore, contributing to the local artistic culture, community, and neighborhood from which they come.

You can also become a Patron member and support the space and our growth for as low as €10/month. These monthly contributions help us to continue providing fair and affordable services to both emerging and established artists. With your support, we can carry on encouraging local cultural growth and prosperity.

Terms and Conditions.

By signing up you must attest that you understand and agree to the following. We ask all patrons/members to understand that it is their responsibility to **remember, review and meet** our contractual agreements. We must also state firmly that **no exceptions** or conditions exist outside this contract.

Contract Renewal and Cancellation

Our contract period are **automatically renewed every month** and can be **canceled** with a **two months notice**. Notices must be done via email. **Membership can be paused** for a period **up to one month** in case of holiday or medical emergency with a doctor's note or travel itinerary.

Rental and Equipment Liability

Each client is **fully liable** for all equipment used during their rented time slots and must **check and report** any issues with equipment **at the beginning** of their time slot. Repairs or replacements **must be paid promptly** and may be redeemable if covered by our or their insurance.

Payment and Fees

All patrons/members must show **proof of** an automatic **SEPA** transaction set up on their end in order to activate membership.

Self service and discounts

To keep our **low prices** we ask you to be as independent as possible when working. Alternatively for a better grasp of our tools we do offer multiple **workshops** including **one-on-one sessions**.

Mandatory Orientation Workshops

For some of our more **delicate machines**, we now require a **25€ orientation workshop** in order to **avoid damages** and further delays for other clients. The current machines that require these workshops are (**Imacon scanner, Jobo cpp2 & Durst colour processors**). Members who can demonstrate prior experience are exempt. Price is for each workshop not both together.

Booking time slots

Time slots are booked online or on a first come first serve basis. You are encouraged to plan and book **2 days** in advance or more. **Booking online** is blocked starting **12 hours before sessions** and cancellations must be made at least **48 hours** before sessions.

Lab Behavior

Our lab functionality depends on **mutual respect** and care for how each workspace or machine is left for the next member. So special care is needed in **returning items** to their original location after use, keeping **communal gloves** or other materials in places of origin and clean. This also includes **scanner holders** as well as **washing up** after film or paper processing and placing in the **correct drying cabinets**. We charge a cleanup **fee of 5€** if lab is left untidy.

Instagram and web store

We have a growing and **lively curated Instagram feed** that include all our patrons/members as well as artists from the **<Rembrandt> Store**. We are also working on a curated **Online print web store** which **Patrons** and **Crit** members are welcome to sell their work on with a **30% commission**. The web store is coming soon.

Shows and Zine

Our shows and zines will be all under the decision process of the **individual curators** from **<Rebrandt>**. Any **works and zines sold** in our store or during our events have a **30% commission** for **<Rebrandt>**.

Workshops

We have **in-depth workshops**, which other members are also encouraged to offer. For **collaborative workshops** a **30% commission** is taken.

*We outsource our online booking and have no control over the stability of the site. When glitches arise we contact them and wait for results. Booking through email, phone, or in person is then available.
